

Sewer Funding Eligibility

Southeast Michigan

- Eligible Sewer Service Areas
- Eligible Sewer Service Areas Based on RC2 Review

Note:
 Areas eligible for State and Federal funding are based on the adopted 208 Water Quality Management Plan. The scale of this map is not suitable to site specific applications.

This map does not identify the location of sewer lines or interceptors. Assembly is part of updating the Water Quality Plan for Southeast Michigan. Amendments to this map are subject to approval by SEMCOG's Regional Clearinghouse Review Committee (RC2).

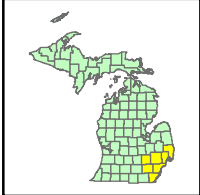

Facilities located in "Eligible Service Areas" are not necessarily connected to sewer lines.

"Eligible Based on RC2 Review" are areas added based on approval of the RC2.

This map does not preclude the addition of sewer services in any part of the region, but only addresses the use of limited State and Federal funding.
