Survey development in progress

Purpose of the survey: ...?

 Give the Township Board and Planning Commission useful information to guide their decisions.

Well...YEAH.

- Determine if and how demographic status (age, income, education, gender) affect opinions.
- Determine if and how the respondents' location affects their opinions.

To be dealt with in analysis, as long as we ask the right questions.

- To guide planning, by identifying which features of an ideal future township are the most important to residents
- Determine the relative strength of opinions about what is good for the community.
- Test residents' tolerance for the cost of implementing their top priorities.

Master plan survey items.

- Broadly determine whether the residents of Northfield Township want more residential development in the township and measure the strength of their opinions.
- Determine how the possible location of residential development affects opinions.

Determining support for a specific priority.

- Determine the relative strength of opinions regarding how people perceive they might benefit from development and preservation.
- Identify other reasons why people oppose or support more development.

Conflict analysis?

Two surveys referenced... what do we already know?

1994 Survey of Northfield Township Residents

Contemporary population: 7,340 Number of survey respondents: 242

Participation rate: 3.3% 95% confidence bound

Random sample frame; scientifically valid sample size

Few demographic questions asked

2010 Northfield Township Comprehensive Community Survey

Contemporary population: 8,245 Number of survey respondents: 368

Participation rate: 4.4% 95% confidence bound

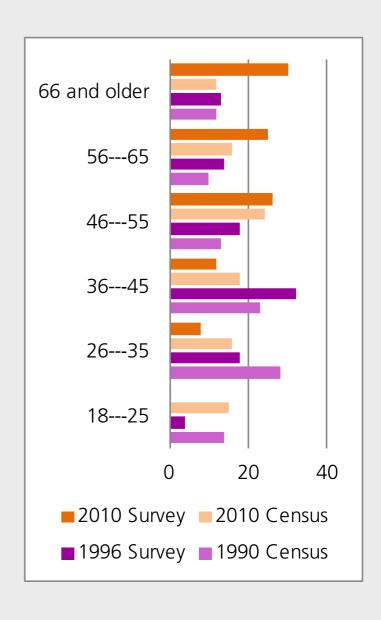

"Self-selected" participants

More detailed demographic and geographic information collected

Respondent Profiles

2010 Survey Demographic Information	Mode Response	Percent	Township
Income	\$25,000-\$49,999	22.5	27.9
Education	Bachelor's	26.5	21.4
Employment status	Employed	51.6	64
Place of work (geographic)	Ann Arbor	34	
Number in household	2	59	2.58
Number of children in household	2	44	
Township residency (Y/N and how long)	Yes	93	
Property ownership (Y/N, type, number)	Yes	93	
School district	Whitmore Lake	81	
Business ownership (Y/N, subarea)	No	97	
Subarea of residence	Lakes	66	60% of parcels
Residential property type	Single family < 1 acre	49	
"When asked where you live, how do you respond?"	Whitmore Lake	66	

Two surveys referenced... what do we already know?

- Determine if and how demographic status (age, income, education, gender) affect opinions.
- Determine if and how the respondents' location affects their opinions.

To be dealt with in analysis, as long as we ask the right questions.

The questions were asked.

Both surveys make valuable contributions.

Each has some representative weakness.

The area of weakness is different in each survey, which lends reliability to the areas in which they agree.

Where the same questions are asked, the two surveys constitute a time series that tests changes in opinion.

Two surveys referenced... what do we already know?

Preserve natural features

Content Analysis: Priorities

Provide additional space and/or incentives for

light industrial and office development

Redevelop vacant commercial

Encourage commercial development Preserve agricultural use of land in areas planned for such use. Improve the appearance of downtown "hamlet" area to make it more attractive and inviting to shoppers and visitors.

Enforce zoning and building

Encourage walking and bicycling by providing more, and safer, sidewalks and bike paths

Provide a safe public beach on Whitmore Lake. Improve vehicle traffic flow in the downtown area.

Provide additional public parks and recreational areas Encourage new commercial development in the downtown (hamlet) area. Develop regulations permitting residential

Improve traffic flow on and off US--23.

Develop regulations permitting residential development while still preserving rural character in areas planned for agricultural use

Improve drainage in residential areas

Expand the sanitary sewer system.

Municipal water supply

Key:

Preservation
Commercial and downtown development
Infrastructure and zoning
Recreation
Vehicular transportation
Housing
Industrial

Extend or modify roads east of US--23 to improve traffic flow. Housing for young families Affordable housing Senior housing

Offer public transportation to and from Ann Arbor.

Reduce minimum lot size requirements in some areas planned for agricultural use to permit additional residential development.

Encourage Federally assisted housing

Master plan survey items.

- Broadly determine whether the residents of Northfield Township want more residential development in the township and measure the strength of their opinions.
- Determine how the possible location of residential development affects opinions.
 Determining support for a specific priority.

We do know which features of the Township are most important to residents, and the relative strength of their opinions.

Broadly speaking, residential development has limited support as a priority. Tolerance for the cost of residents' priorities has not been answered. It should be.

Two surveys referenced... what do we already know?

Two surveys referenced... what do we already know?

- Determine the relative strength of opinions regarding how people perceive they might benefit from development and preservation.
- o Identify other reasons why people oppose or support more development.
 Conflict analysis?

One cause of conflict is likely simple frustration over wasted horsepower. Another source may be the mismatch between the residents' priorities and the Township's recent focus.

Cobalt's questions appear to be identifying specific desirable or undesirable aspects of residential development, presumably to address them directly. This is certainly a reasonable approach, but there may be better methods than a comprehensive survey.

Conclusions: Survey Assessment

The previous surveys were constructed well enough to offer actionable data.

Resident priorities have been broadly determined.

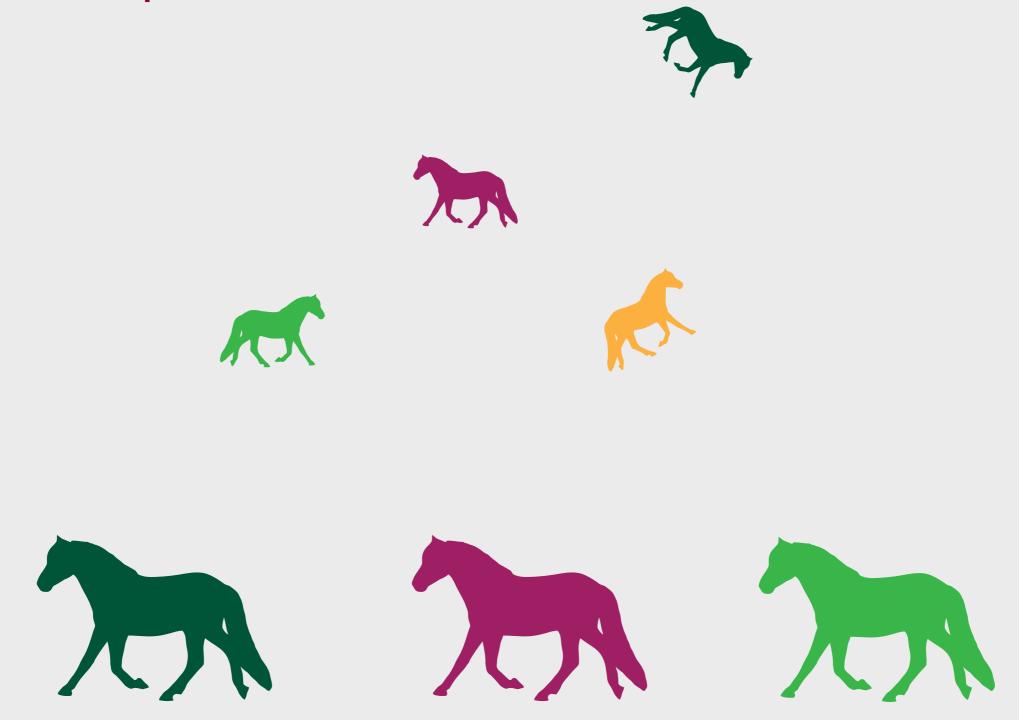

The top three priorities are natural features, downtown development, and recreation.

Residential development does not appear to be a strong enough priority to justify amending the master plan at this time.

Specific questions remain for which community input would be valuable.

Community engagement tools other than a survey may be more appropriate to gather that particular data.

Next Steps: Now What?

Next Steps: Now What?

Current status:

HRWC coming for green infrastructure workshop results - excellent start.

BRI will use HRWC data to begin an Ecological Asset map, to which we will contribute our resources.

There is no good data on agricultural resources in the Township, though we know they exist.

This priority enjoys the support of advocates.

Community engagement:

An Agricultural Asset Inventory should be conducted to obtain data that is currently lacking. This task can be performed exceptionally well with a small group of volunteers.

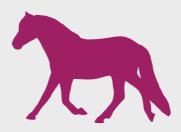

Desired outcome:

Ecological Asset Map

Agricultural Asset Map

A general understanding of the spatial location of the Township's most valuable natural resources.

Planning Commission's role: Lead

Downtown Development

Current status:

A Downtown Master Plan process is beginning.

It is not expected to be handled by the PC or its staff for budgetary reasons, though contributions may be welcome.

The purpose of the plan is to develop a unified vision that will enable implementation.

Community engagement:

This has the potential to be the highest-profile project that the community ever undertakes.

The level of community involvement must be commensurate with the plan's ambition.

A community engagement program should be developed that offers distinct opportunities for input to various groups. This may be an opportunity for the PC to contribute.

Citizen contributions to the establishment of priorities and to major conceptual designs will be critical to implementation.

Desired outcome:

An agreed-upon vision for a revitalized downtown and a realistic action plan to implement it.

Planning Commission's role: Collaborate

Current status:

The Recreation Commission and Township staff are updating the Five-Year Recreation Plan.

Projects in this plan help determine the availability of State funding resources to the Township.

Consideration of public access to the lake makes recreation planning inseparable from downtown planning.

Community engagement:

Some form of it is necessary, but the requirements are general.

It can be tied in with other efforts, which MDNR values.

Desired outcome:

A synergistic relationship between recreation planning and general planning efforts.

Planning Commission's role:
Contribute

And then hopefully...

And THEN hopefully...
